PROFESSIONAL SUMMARY -----

Aspiring Web Developer with strong knowledge of modern web technologies and hands-on experience building responsive, user-centric applications. Passionate about crafting clean, efficient code and continuous learning. Skilled in React, Next.js, MongoDB, and Tailwind CSS, with personal and portfolio projects demonstrating practical development ability.

AREA OF EXPERTISE -----

- Python
- Java
- C
- HTML & CSS & JS
- NEXT.JS
- MongoDB & SQL
- Git & GitHub

PROJECTS -----

Library Management System : Developed a responsive Library Management System using HTML, CSS, and React for an intuitive front-end interface. Integrated MongoDB for efficient data storage and retrieval. Features include book cataloging, user management, and real-time updates, streamlining library operations and enhancing user experience.

Personalized Government Info Portal (PGIP) : It is a smart web application developed using HTML5, CSS3, and JavaScript for the frontend, with JavaScript (Node.js) and MongoDB for the backend and database. It delivers customized updates on government schemes, competitive exams, and tax-related information based on users' personal and professional profiles.
